

STELLIFY DEVELOPMENTS LTD
ENVIRONMENTAL & WASTE MANAGEMENT POLICY
STATEMENT OF INTENT

Introduction

This Stellify Developments Ltd Environmental & Waste Management Policy Statement of Intent is concerned with achieving and demonstrating sound environmental performance through the identification and control of the impacts of our activities and services on the environment consistent with our overall environmental policy and objectives.

Through the implementation of this Statement of Intent, SDL Departments will be provided with the assurance that their performance meets and will continue to meet their legal and policy requirements.

Commitment and Objectives

SDLs' objective regarding the environment is to ensure that we understand and effectively manage the actual and potential environmental impact of our activities. Our operations will be conducted with due consideration being given to sustainability and the limited use of natural resources. We will comply with all legal requirements in areas where we carry out our business to prevent damage to the environment.

Our commitment extends to all our activities, wherever they take place, which have the potential to adversely affect the environment. We aim to prevent environmental damage, minimise energy and resource usage and ensure that the principles of sustainable development are operated throughout all JSL operations.

We will therefore:

- Identify the significant environmental aspects and impacts from current and relevant past activities and services and, where we have direct control or can be expected to have an influence, implement an appropriate environmental management system;
- Minimise and where reasonably practicable, eliminate any adverse impact on the environment arising from the activities of our business;
- Minimise the use of energy, resources consumed and waste produced while undertaking our business activities in a safe and professional manner;

- Support the reduction, reuse and recycling of materials and ensure the legal disposal of all waste arising from the activities of the business;
- Comply with legal requirements and where appropriate go beyond compliance with the minimum environmental requirements of legislative bodies and our customers;
- Make appropriate resources available to manage the environment and ensure human resource roles, responsibilities and authorities are defined.
- Ensure that all staff whose work may create a significant impact upon the environment are provided with adequate and appropriate information and training and are competent in environmental matters;
- Inform and train our staff in understanding and fulfilling their environmental responsibilities;
- Inform our suppliers of our environmental standards and request that they sign up to them;
- Regularly review our environmental management system at senior management level against our objectives and targets with a view to continually improving our environmental performance.
